8. A flight under HIA out of hours permission, the pilot must call the destination airport from a range of at least 10 miles on the notified frequency to check whether it is manned. If no reply is received, attempts to make RT calls should be continued on the proper frequency to make presence known to any other aircraft in the vicinity. As part of this condition, operators are required to satisfy themselves that their radio equipment is serviceable prior to departure. Aircraft which do not have radio equipment fitted do not comply with the conditions of the Scheme.
9. The Permit will be applicable to all flights made for purposes other than those defined in Articles 101 (2) (a), (b) and (c) of the Air Navigation Order 2000, ie movements which do **not** require a LICENSED AERODROME. In addition, fixed wing aircraft which exceed 5,700 kgs will **not** qualify under this Permit scheme.
10. Pilots should note there may be surface contamination which could include FOD.
11. The presence of bird activity on or adjacent to, the airport can create a serious risk of birdstrike. There are **no** on-site staff to provide a deterrent for bird activity outwith the published opening hours. Localised flocks of birds, particularly Geese and Gulls are especially evident at Islay and Kirkwall but could occur anywhere.
12. The use of Sumburgh Airport out of hours is restricted to Runway 15/33. Runway 09/27 is **unavailable** to out of hours movements.

*NOTE: The Company strongly recommends that owners and operators request that rescue and fire fighting services be provided by the Company. Owners and operators are referred, where appropriate to the current Notices to AOC Holders.*
